Gridsum Regains Compliance with NASDAQ Listing Requirement for Minimum Market Value of Publicly Held Shares

BEIJING, June 10, 2020 — Gridsum Holding Inc. (“Gridsum” or the “Company”) (NASDAQ:GSUM), a leading provider of cloud-based big-data analytics and artificial intelligence (“AI”) solutions in China, today announced that on June 9, 2020, it received a letter from the Listing Qualifications Department of The Nasdaq Stock Market (“Nasdaq”), indicating that for the twenty consecutive trading days from May 11, 2020 to June 8, 2020, the Company’s Market Value of Publicly Held Shares (“MVPHS”) had been \$15,000,000 or greater as required for continued listing on The Nasdaq Global Select Market. Accordingly, the Company has regained compliance with such requirement, and the matter is now closed.

As previously reported, on April 17, 2020 and May 1, 2020, the Company received notices from Nasdaq’s Listing Qualifications Department, indicating that the Company was not in compliance with the minimum bid price requirement of \$1.00 per ADS and the minimum MVPHS requirement of \$15,000,000, respectively, for continued listing on The Nasdaq Global Select Market.

After regaining compliance with the minimum MVPHS requirement, the Company intends to continue to monitor the bid price of its ADSs, and consider available options if its ADSs do not trade at a level likely to result in the Company regaining compliance with the minimum bid price requirement. However, there can be no assurance that the Company will be able to regain compliance or that Nasdaq will grant the Company a further extension of time to regain compliance, if necessary.

About Gridsum

Gridsum Holding Inc. (NASDAQ: GSUM) is a leading provider of cloud-based big-data analytics and AI solutions for multinational and domestic enterprises and government agencies in China. Gridsum’s core technology, the Gridsum Big Data Platform and the Gridsum Prophet: Enterprise AI Engine, is built on a distributed computing framework and performs real-time multi-dimensional correlation analysis of both structured and unstructured data. This enables Gridsum’s customers to identify complex relationships within their data and gain new insights that help them make better business decisions. The Company is named “Gridsum” to symbolize the combination of distributed computing (Grid) and analytics (sum). As a digital intelligence pioneer, the Company’s mission is to help enterprises and government organizations in China use data in new and powerful ways to make better-informed decisions and be more productive.
